

Docket No. 2000-010

REMARKS

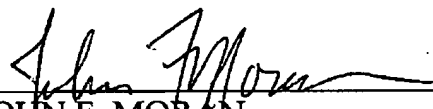

In response to the Notice of April 12, 2006, applicants have removed all references to Fig 6D from the specification. A Continuation-In-Part was filed on 29 Sep 2004, which incorporates Fig 6D and has a single claim directed to that embodiment.

A new substitute specification is included that does not have claims since they have not been changed or amended. The substitute specification reflects the deletions in accordance with this amendment.

Please advise the undersigned if there are any questions or if any additional information should be included.

Respectfully submitted,

25 April 2006
